

Ultra-Lite Mastic

An Important Component of the
PCS Petrolatum System

Formulated for stability and plasticity over a wide temperature range.

Use: Above or below ground and submerged pipe and fittings.

Closed cell polymer beads are added to lessen product density.

Will profile deep crevices and sharp angular profile changes, enabling PCS Tape to be applied without bridging or voiding.

Examples of Use: duct sealing, joint reinstatement, deep crevice filling.

Based upon petrolatum compound blended with inert fillers, corrosion inhibitors.
